No. 392. April, 1966

R. G. WALKER

Acting Deputy Commonwealth Statistician

Bureau of Census and Statistics

SYMBOLS

Standard notations are used throughout this publication, with meanings as follows:—

n.a.	Not available.
n.y.a.	Not yet available.
r	Revised.
p	Preliminary or subject to revision.
...	Nil, or less than half the final digit shown.
—	Where drawn across a column between two consecutive figures, indicates break in continuity of series.

ROUNDING OF FIGURES

Where figures in this publication have been rounded, any discrepancies between the totals shown and the sums of the component items are due to rounding.

DECIMAL CURRENCY

In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar (\$), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this publication have been converted to the equivalent amounts in decimal currency.

2. Wage and Salary Earners in Civilian Employment in N.S.W.: Government and Private

(Excluding employees in rural industry, employees in private domestic service, and Defence Forces)

Notes:—

- The current series of employment statistics is based on benchmark data derived from the 1954 and 1961 censuses of population. For periods between and since the censuses, the estimates are derived from:—
 - monthly returns supplied by employers for purposes of Commonwealth pay-roll taxation;
 - monthly returns from governmental authorities;
 - some other direct records of monthly employment (e.g. hospitals); and
 - estimates of changes in the number of employees outside the scope of the previous sources.

The figures for current months are subject to revision in the light of annual factory censuses, periodical surveys of retail establishments, and other collections.

- Employees in rural industry and in private domestic service, and members of the full-time defence forces at home or abroad, are excluded from the scope of the series.
- The series is designed to measure the *current monthly trends* in the defined fields. The estimates are compiled on an establishment or enterprise basis, and the benchmark data (which have been derived from industry tabulations compiled on the occasion of the population censuses from schedules provided by individuals) have been adjusted as nearly as possible to this basis.

* Total earnings divided by total civilian employment expressed in male units. "Earnings" includes salaries, wages at award rates, overtime, over-award and bonus payments, commissions, etc., but excludes payments to members of the Defence Forces. "Male units" represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

† Includes Australian Capital Territory.

Note. Comparisons as to trend should be made for complete years or corresponding quarters, as the quarters are affected by seasonal influences.

* Relates to industrial disputes involving a stoppage of work for a minimum of 10 mandays. The figures include the time lost by employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; they exclude the time lost, as a result of the disputes, by employees in other establishments.

9. Population, Migration, Births, Deaths, and Marriages, New South Wales

Note. The estimates of the population for periods between 1954 and 1961 censuses of population have been revised in the light of the final results of the 1961 census. The revised estimates represent the population ascertained at the 1954 census plus the subsequent natural increase and net migration (recorded net migration plus an adjustment for the discrepancy disclosed by the 1961 census). The estimates for periods since the 1961 census are subject to similar revision when the population is ascertained at the next census.

BUILDING ACTIVITY IN NEW SOUTH WALES

Notes. 1. Building is classified as *private* or *government* according to ownership.

2. Figures of *building approved* have been compiled from (a) permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities, and (b) contracts let or work commenced and day labour projects authorised by governmental authorities. Some building in rural areas is excluded.

3. The *value of building jobs approved* represents the estimated value of the whole job when completed, excluding the value of the land on which the job is carried out.

* Includes government-owned vehicles other than those of the Defence Services, but excludes tractors, trailers, caravans, and mobile plant and equipment.

† This series is based on the 1955 and 1962 Censuses of Motor Vehicles and the records of State and Commonwealth registration authorities, and involves a type classification which is standard for all Australian States. The series differs from the former series (compiled by the Department of Motor Transport), primarily because of differences in the classification of vehicles and in the method of treating cancellations of registrations.

* Weighted average rate on first mortgages registered, where mortgagee is a corporation (other than a bank or a building society), or an individual. Mortgages taken by Government Agencies are excluded. Average for year or for 3 months ended month shown.

† Average of daily yields (based on contract price excluding brokerage), for week centred on last Wednesday in each month, for theoretical 2-year and 20-year securities (derived from a freehand curve). Compiled by Reserve Bank.

‡ Rate current at end of period.

¶ The minimum period of deposit is 3 months except (since April, 1964) for amounts of \$100,000 or more on deposit for periods of one month but less than 3 months (maximum rates: 3.75 per cent. per annum until 10th March, 1965; 4.25 per cent. per annum since then). The maximum period of deposit is 24 months (15 months before 29th September, 1964, and 12 months before September, 1962).

§ The maximum amount on which interest is paid has been \$6,000 since July, 1961.

|| Yield on issue price. Until 14th February, 1966, an income tax rebate (10 cents per \$1 of interest) was allowed on interest from Treasury Notes.

47. Index of Prices of Shares on Sydney Stock Exchange

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per \$2 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

53. Export Price Index, Australia

Note :-

1. The current Export Price Index is compiled as a weighted average of the relative price movements of 29 commodities, the weights being based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. In these years, the selected commodities accounted for about 83 per cent. of the total value of Australian exports.
2. A comparable series of index numbers has been compiled by linking, at the year 1959-60, the "All Groups" Index in the current and previous Export Price Indexes. The index numbers (Base: 1959-60 = 100) for the years 1954-55 to 1958-59 are 114, 105, 117, 102, and 90 respectively.

54. Wholesale Price (Basic Materials and Foodstuffs) Index

Commodities are priced in their primary or basic form wherever possible. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

55. Wholesale Price Indexes: Various Countries

Source: *Monthly Bulletin of Statistics*, United Nations Statistical Office

The items priced and the levels at which they are priced in these indexes vary from country to country according to the purpose of the index. The indexes do not therefore measure relative prices as between countries.

56. Consumer Price Index

The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage-earner households. The Index covers a large and representative selection of commodities and services arranged in five major groups—food, clothing and drapery, housing, household supplies and equipment, and a miscellaneous group. Significant changes in consumer expenditure patterns have been reflected in the Index by the introduction of additional items and altered weighting patterns.

Base of each Group Index: 1952-53 = 100.0

* For State Awards, the amounts shown to February, 1959 represent the basic wage together with so much of any margin and any further amount necessary to make the minimum wage payable equivalent to 75 per cent. of the basic wage for males. Following the increase in the basic wage to the 75 per cent. equivalent, the amount shown from February, 1959, is the basic wage exclusive of any margin. This change was applied in State Awards from different dates, beginning in March, 1959.

† Quarterly adjustments for movements in retail prices were discontinued in September, 1953, in both Commonwealth and State Awards. They were restored in State Awards in November, 1955, but were again discontinued from June, 1964.

‡ Rates current in June, 1966.

58. Weighted Average Minimum Weekly Wage Rates, N.S.W.

Notes:—

- The indexes of minimum wage rates embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The wage rates used in the indexes are the rates payable for a full week's work (excluding overtime), as prescribed in representative industrial awards, determinations, and agreements. The rural industries are excluded from the indexes.
- The money amounts shown should not be regarded as actual current averages, but as an index of changes expressed in money terms.
